

EXCEPTIONAL COMMUNITY HOSPITAL – MARICOPA ANNOUNCES PHASE 2 FAST TRACK ADDITION

Dallas, Texas (January 7, 2022) - Exceptional Health Care has announced that they will begin the Phase 2 addition/building of the Fast Track care option in its Emergency Department at Maricopa's Community Hospital in an effort to reduce wait times. This move aims to lighten the patient load in the triage area while emphasizing the differences between non-acute and more urgent patient care needs.

"Although we have been opened only a few weeks, we saw an opportunity to improve efficiency and care inside the Emergency Department," said Saeed Mahboubi, CEO of Exceptional Health Care. "This will not only speed up the time it takes for them to be treated, but also improve care times for our more critical patients."

Patients with minor emergencies, such as Covid tests, small burns and lacerations, ear infections, cold and flu symptoms, sore throats, and sprains, will now be treated in the Fast Track area located inside the Emergency Department.

Bruce McVeigh, COO of Exceptional Health Care, recognized the need to have a fast-track process and brought together hospital administration, the medical director, nurses, techs, architects, and engineering to create an efficient and effective treatment area and plan. The team quickly came up with designs for a seven-bay unit for the new Fast Track build out.

"The Fast Track addition is essential for our community hospital. This structural triage provides the appropriate path for patients who want to receive exceptional care and be discharged as quickly as possible," said Timothy Johns, MD.

Fast Track care facilities are shown to improve patient satisfaction and dramatically reduce patient wait times. Due to the current Covid crisis, our

number one priority is the health and safety of our staff and patients, and that's why we are dedicated to providing the highest level of care with the shortest amount of wait times.

Emergencies can happen anytime, anywhere. The dedicated team of nurses, physicians, and other healthcare staff at Exceptional Community Hospital - Maricopa are available around the clock to care for Maricopa and other neighboring communities. Our staff provides prompt and compassionate care for patients with varied conditions and accepts all insurance.
